UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

GCE Advanced Subsidiary Level and GCE Advanced Level

MARK SCHEME for the October/November 2008 question paper

9698 PSYCHOLOGY

9698/02

Paper 2 (Core Studies 2), maximum raw mark 50

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2008 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	GCE A/AS LEVEL – October/November 2008	9698	02

Section A

Qι	estion	Description	Mark	Max
1	(a)	Most imitative aggression shown in the aggressive model condition, boys imitated aggression more than girls, non-aggressive model had an inhibitory effect, some examples of same sex modelling.	2	
	(b)	The fact that aggression seemed to be down to learning supports the nurture view, the fact that boys imitated aggression more than girls could be argued to be nature or nurture. Just mentioning that it is nurture is 1 mark, just mentioning nature is 0.	2	[4]
2	(a)	Interviews with parent/adolescents/teachers, psychometric tests on parents/adolescents (RutterA/B), Questionnaire on social difficulty.	2	
	(b)	Social desirability effect, validity of psychometric tests.	2	[4]
3		Any two from : conducted in laboratory setting, artificially induced physiological reaction etc. Example plus explanation.	2 + 2	[4]
4	(a)	Staff ignored the patients when they asked them questions, avoided eye contact, spent little time with them, waiting in queue.	2	
	(b)	By ignoring the rights of psychiatric patients they do not have to be dealt with/released in society, reducing their rights makes them less of a problem, stickiness of psychiatric labels.	2	[4]
5	(a)	Any one from: Alpha, Beta, spoken test, with description for 2 marks.	2	
	(b)	Example of ethnocentric bias in the questions, or the way it was administered.	2	[4]

Partial/full answer

	GCE A/AS LEVEL – October/November 2008	9698	02

6	(a)	Outline the qualitative data collected in each of these studies.	
		Thigpen and Cleckley (multiple personality)	
		Freud (Little Hans)	
		Dement and Kleitman (sleep and dreaming)	
		Rosenhan (sane in insane places)	
		Emphasis on study. Answers must be related to named studies.	
		One point from each study.	
		Indicative Content: Thigpen and Cleckley: data from hypnosis, interviews etc, Freu	
		letters from father to Freud including dream analysis etc, Dement and Kleitman content Rosenhan: diary notes and observations from hospitals.	n: dream
		For each point up to a maximum of FOUR points	
		No answer or incorrect answer.	0
		Identification of point relevant to question but not related to study or comment	1
		from study but no point about qualitative data.	
		Description of point about qualitative data (comment without comprehension).	2
		As above but with analysis (comment with comprehension) about qualitative	3
		data.	
		Max mark	10

(b)	What are the strengths and weaknesses of qualitative data?	
	Emphasis on problem. Answers supported with named (or other) studies. Each	
	problem does not need a different study; can use same study.	
	Indicative Content: strengths: detailed allows in-depth analysis, allows the person to express themselves rather than forced choice.	
	Weaknesses: possible bias in interpretation, more difficult to analyse, more dif	ficult to
	compare people.	
	For each point up to a maximum of FOUR points	
	Problem with study itself NOT related to qualitative data.	0
	Identification of strength/weakness related to qualitative data.	1
	Description of strength/weakness related to qualitative data.	2
	Description of strength/weakness related to qualitative data applied to study effectively.	
	Max mark 10	

Page 4	Mark Scheme	Syllabus	Paper
	GCE A/AS LEVEL – October/November 2008	9698	02

(c)	Which is more useful: quantitative or qualitative data? Give reasons for answer.	r your
	Emphasis on point. Answers supported with named study (or other) studies/evia	
	One or two general statements which may be inaccurate, incomplete or muddled.	1–2
	General statements are made which are focused on the question but are basic, lacking in detail and have no supporting evidence. For four marks there may be general statements with anecdotal evidence or vague reference to supporting psychological evidence.	3–4
	A number of points are made which are focused on the question and are generally accurate. There is some supporting psychological evidence but there is little detail and no attempt to justify the points OR as for 7–8 marks but with only two points.	5–6
	Four points (best four) are made which are focused on the question and are accurate. There is supporting psychological evidence with an attempt to justify the points. There is increased detail but the range of arguments is limited and there may be an imbalance OR as for 9–10 marks but with only 3 points.	7–8
	A range of different points (best four) is made which are accurate and show understanding. Each point has appropriate supporting psychological evidence. The arguments are well expressed, well considered, are balanced, and reflect understanding which extends beyond specific studies. There may well be a consideration of the implications and effects.	9–10
	Max mark	10

7	(a)	Outline the cognitive processes that were investigated in each of these s	tudies.
		Deregowski (picture perception)	
		Baron-Cohen, Leslie and Frith (autism)	
		Loftus and Palmer (eyewitness testimony)	
		Gardner and Gardner (Project Washoe)	
		Emphasis on study. Answers must be related to named studies.	
		One point from each study.	
		Indicative Content: Deregowski: picture perception Baron-Cohen: Theory of	mind
		Loftus and Palmer: eyewitness testimony	
		Gardner and Gardner: language (with explanation for full marks)	
		For each point up to a maximum of FOUR points	
		No answer or incorrect answer.	0
		Identification of point relevant to question but not related to study or comment	1
		from study but no point about influences on cognitive processes.	
		Description of point about application to influences on cognitive processes	2
		(comment without comprehension).	
		As above but with analysis (comment with comprehension) about influences	3
		on cognitive processes.	
		Max mark	10
