São Paulo, Brazil, never saw so many tourists: 11 million

São Paulo, Brazil's largest city and the main economic hub in the country, received 11 million tourists in 2009, 2.8% higher than recorded in 2008. São Paulo received 9.3 million Brazilian tourists and 1.7 million foreigners in 2009. Visitors spent US\$3.5 billion, which is 2.5% more than in 2008.

The main reasons for foreigners' visits were:

- business (57.2%)
- visits to relatives and friends (20.7%)
- leisure (13.6%).

The main reason for domestic tourism was to visit relatives and friends. These domestic visitors mainly use buses to come to the city, followed by aircraft and their own cars. The average spending was US\$408 per domestic tourist and the month in which the greatest number of tourists came was December.

In the hotel sector, the average occupation was 68.5% in 2009. The average daily spend in hotel fees was US\$68.

Mauritius' tourism receipts down

Mauritius saw an 18% decline in tourism receipts in the first half of 2009 as the global economic downturn discouraged visitors. Mauritius, which is best known for its azure waters, white beaches and luxury spas, has run an aggressive international marketing campaign while its hotels have offered big discounts as the country tries to maintain market share.

Arrivals from Europe fell by 6.9%, led by a 19.1% decline in German arrivals, a 14.3% decline in Italian arrivals and a 6.9% fall in visitors from Britain. France, which is Mauritius' leading market, was the exception with a 2.0% increase.
