MARINE SCIENCE

5180/02

Paper 2

October/November 2015

1 hour 30 minutes

Candidates answer on the Question Paper.

No Additional Materials are required.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use an HB pencil for any diagrams or graphs.

Do not use staples, paper clips, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Section A

Answer **both** questions in this section.

Write your answers in the spaces provided on the Question Paper.

Section B

Answer **both** questions in this section.

Write your answers in the spaces provided on the Question Paper.

Electronic calculators may be used.

You may lose marks if you do not show your working or if you do not use appropriate units.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

Section A

Answer both questions in this section.

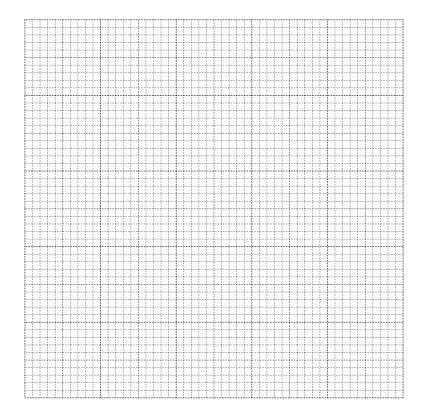

1 Cod, haddock, plaice and whiting are commercially important species of fish caught in the North Sea.

Table 1.1 shows the spawning stock biomass of cod in the North Sea for the years 1990, 1995, 2000, 2005 and 2010.

Table 1.1

| year | spawning stock biomass of cod /thousand tonnes |
|------|---|
| 1990 | 80 |
| 1995 | 80 |
| 2000 | 50 |
| 2005 | 26 |
| 2010 | 52 |

(a) (i) Plot a line graph of the data in Table 1.1. Join the points on your graph with straight lines.

[5]

(ii) Describe the trend in the spawning stock biomass from 1990 to 2010.

| | | | omass for haddock, pla | aice and whiting every fi | ve yea |

| ' | | aculture. |
|----------|-----|---|
| | • | naculture of salmon is an important industry in Scotland, producing over 140 000 tonnes of mon per year. |
| | (a) | Suggest three advantages of producing salmon by aquaculture, rather than harvesting wild salmon. |
| | | 1 |
| | | 2 |
| | | |
| | | 3 |
| | | [3] |
| | (b) | Salmon in aquaculture may become infested with sea lice. Sea lice are considered to be pests because they are external parasites of salmon. |
| | | Suggest what effect sea lice would have on the yield of salmon. Give a reason for your answer. |
| | | effect |

(c) Residues of pesticides in food are carefully measured.

Table 2.1 shows the concentrations of pesticide residues in eight samples of wild salmon and in eight samples of salmon produced in aquaculture.

Table 2.1

| | concentration of pesticide residues/mg per kg | | | |
|---------------|---|-----------------------------------|--|--|
| sample number | in wild salmon | in salmon produced by aquaculture | | |
| 1 | 0.003 | 0.009 | | |
| 2 | 0.000 | 0.003 | | |
| 3 | 0.004 | 0.010 | | |
| 4 | 0.003 | 0.009 | | |
| 5 | 0.000 | 0.010 | | |
| 6 | 0.010 | 0.010 | | |
| 7 | 0.007 | 0.008 | | |
| 8 | 0.003 | 0.020 | | |
| mean | | | | |

| (i) | Complete Table 2.1 by calculating the mean concentrations of pesticide residues in wild |
|-----|---|
| | salmon and in salmon produced by aquaculture. |

| Vrite | your answers in the emp | v boxes in Table 2.1. | [2] |
|-------|-------------------------|-----------------------|-----|
|-------|-------------------------|-----------------------|-----|

| (ii) | Compare the mean concentration of pesticide residues in wild salmon with the mea concentration of pesticide residues in salmon produced by aquaculture. Suggest reason for the difference. | а |
|------|--|----|
| | | •• |
| | | •• |
| | | |
| | | |
| | | |
| | | |
| | r | |

| | (iii) | Suggest two economic considerations which should be made before using pesticides in aquaculture operations. |
|-----|-------------|--|
| | | 1 |
| | | |
| | | 2 |
| | | [2] |
| (d) | | cking density is important in aquaculture. Stocking density is the mass of fish per unit ime of water. |
| | Son wate | ne organisations recommend a maximum stocking density for salmon of 22 kg per m ³ of er. |
| | _ | gest three reasons why a high stocking density may reduce the yield of salmon produced quaculture. |
| | 1 | |
| | | |
| | 2 | |
| | | |
| | 3 | |
| | | [3] |
