GEOGRAPHY 2217/21

Paper 2 May/June 2011

2 hours 15 minutes

Candidates answer on the Question Paper.

Additional Materials: Ruler

Calculator Protractor Plain paper

1:50 000 Survey Map Extract is enclosed with this question paper.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name in the spaces provided.

Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Section A

Answer all questions

Section B

Answer one question.

Sketch maps and diagrams should be drawn whenever they serve to illustrate an answer.

The Insert contains Photograph A for Question 3, Figs 11 and 12 for Question 7, and Figs 14 and 16 and Tables 5 and 6 for Question 8.

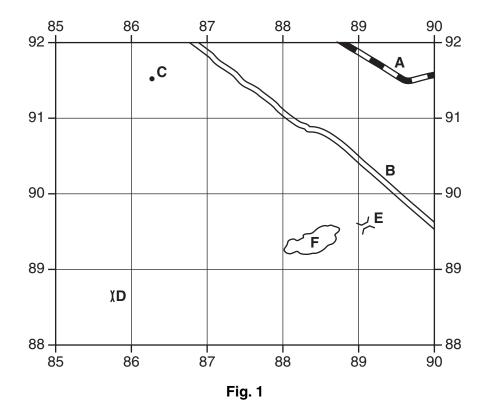

The Survey Map Extract and the Insert are **not** required by the Examiner.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

Section A

- Answer all questions in this section.
- 1 The 1:50 000 map is of Macheke, Zimbabwe.
 - (a) Study the area of the map shown in Fig. 1.

(i) Name the feature at A.

.....[1]

(ii) What type of road is at **B**?

[1]

(iii) What height is the spot height at C?

.....[1]

(iv) Name the feature at **D**.

.....[1]

(v) Name the feature at E.

[11]

(vi) How many peaks are shown for hill feature **F**?

.....[1]

For Examiner's Use

| (b) | | e the six-figure grid reference of the trigonometrical station on the Percyvale Estature the centre of the map. | е, |
|-----|-------|---|----|
| (c) | (i) | Measure the distance along the road from the bench mark at 708912 to the bench mark at 727915. | • |
| | | | 1] |
| | (ii) | What is the difference in height between the two bench marks? | |
| | | metres [| 1] |
| | (iii) | What is the average gradient along the road between the two bench marks? | |
| | | | |
| | | Gradient is 1: | 1] |

TURN OVER FOR SECTION B

Section B

Answer **one** question in this section.

For Examiner's Use

7 Students heard that waste water from a factory was polluting the local river. They decided to do some fieldwork to see if this was true. However, before they started their investigation their teacher warned them about the possible dangers of doing fieldwork in a **polluted** river. She also suggested some precautions they might take to protect themselves.

| (a) | (i) | Suggest two dangers which their teacher may have warned them about and suggest how they might protect themselves whilst working in a polluted river. |
|-----|------|---|
| | | Danger 1 |
| | | |
| | | Protection |
| | | |
| | | Danger 2 |
| | | |
| | | Protection |
| | | [4] |
| | (ii) | Give two ways that the students would be able to check if the river was polluted before they began their fieldwork. |
| | | 1 |
| | | |
| | | 2 |
| | | [2] |
| (b) | The | students agreed on two hypotheses to investigate. |
| | | Hypothesis 1: The river is most polluted near to the factory and the level of |

Hypothesis 2: Animal life in the river is affected by water pollution.

pollution decreases downstream.

To measure the level of water pollution the students did some research in the local library. They found some secondary data which showed the results of a study into the levels of dissolved oxygen and ammonia in the river. The results of the study included the following:

- Oxygen is essential for animals to live in rivers. Polluted rivers have low dissolved oxygen levels.
- Ammonia is a chemical which pollutes water.

A summary of the secondary data is shown in Fig. 11 (Insert).

For

| | Hypothesis 1: The river is most polluted near to the factory and the level of pollution decreases downstream. |
|-------|---|
| | What evidence on Fig. 11 supports their conclusion? |
| | |
| | |
| (ii) | Suggest why the level of pollution changes downstream from the factory. |
| | |
| | |
| | [2] |
| the | nvestigate Hypothesis 2: Animal life in the river is affected by water pollution students carried out the investigation described in Fig. 12 (Insert). They did the stigation at five sites along the river; these are shown in Fig. 11. |
| (i) | Why did the students disturb the river bed when carrying out the investigation? |
| | [1] |
| (ii) | Should the students have put the net upstream or downstream of the kick-sampling site? Explain your decision. |
| | |
| | |
| | [2] |
| (iii) | Why did the students need to identify the animals found while sampling at each site? |
| | |
| | [1] |
| (iv) | Why did the students do three tests at each site? |

(d) Table 3, below, shows the results of the students' fieldwork. The results are recorded using a tally method.

For Examiner's Use

Table 3

Fieldwork results

| | Unpollute | ed | | Qu | ality of water | | V | ery polluted ► | |
|----------------|-----------|--------|------------|--------|----------------|-------|-------------------|----------------|-------------------------|
| Animal species | Stonefly | Mayfly | Caddis fly | Shrimp | Water louse | Leech | Rat-tailed maggot | Bloodworm | Average Biotic |
| Biotic score | 10 | 8 | 7 | 6 | 5 | 3 | 3 | 2 | Index score at the site |
| Site 1 | 11 | II | II | | 1 | | | | 55/7 = 7.9 |
| Site 2 | | | | | | II | 1 | II | 13/5 = 2.6 |
| Site 3 | | | | | 1 | II | 11 | 1 | 19/6 = 3.2 |
| Site 4 | | 1 | 11 | 1 | 1 | I | | | |
| Site 5 | | II | II | 1 | II | | | | 46/7 = 6.6 |

(i) Calculate the average Biotic Index score for site 4. Put your answer into Table 3. Show your calculation in the space below. [2]

(ii) Plot the average Biotic Index score for sites 4 and 5 on Fig. 13 below. Site 4 is 10.5 km downstream and site 5 is 14 km downstream. [2]

For Examiner's Use

How Biotic Index changes downstream

| | | [Total: 30 marks] | |

8 Students who lived in Thailand were interested in the development of tourism at Chiang Mai, a city in the north of the country. They decided to investigate why tourists came to Chiang Mai and what impact tourism had on people who lived in the city. Their two hypotheses were: Hypothesis 1: Physical attractions brought more tourists to Chiang Mai than human

For Examiner's Use

- attractions.
- Hypothesis 2: Tourism has a positive rather than negative impact on people who live in Chiang Mai.
- (a) The students decided to use the questionnaire, shown in Fig. 14, (Insert), to investigate Hypothesis 1.

'Are you a tourist in this city?'

(i) When they showed their questionnaire to the teacher she suggested that they should start the questionnaire by asking:

| | Why do you think the teacher made this suggestion? |
|------|---|
| | |
| | |
| | |
| | [2] |
| (ii) | Suggest why the students included some physical and human attractions from which tourists could choose. |
| | |
| | |
| | |
| | [2] |

(iii) The answers to Question 1 (Which continent do you come from?) are shown in Table 4 below.

For Examiner's Use

Table 4

Answers to Question 1

| Continent | Number of tourists |
|---------------|--------------------|
| Asia | 26 |
| Africa | 4 |
| Europe | 14 |
| Oceania | 8 |
| North America | 12 |
| South America | 6 |
| Total | 70 |

| What conclusions Thailand? | can you make | from Table 4 | about the origin | of tourists visiting |
|-------------------------------|--------------|--------------|------------------|----------------------|
| | | | | |
| | | | | |
| | | | | [2] |
| | | | | [4] |

(iv) The answers to Question 2 (What are the main physical attractions you are visiting whilst in Chiang Mai?) and Question 3 (What are the main human attractions you are visiting whilst in Chiang Mai?) are shown in Table 5 (Insert).

Use this data to complete the bar graphs in Fig. 15 on page 25 (opposite). Draw the bars to show the number of visits made to the Botanical Gardens and the Buddhist temples. [2]

Tourist attractions

For Examiner's Use

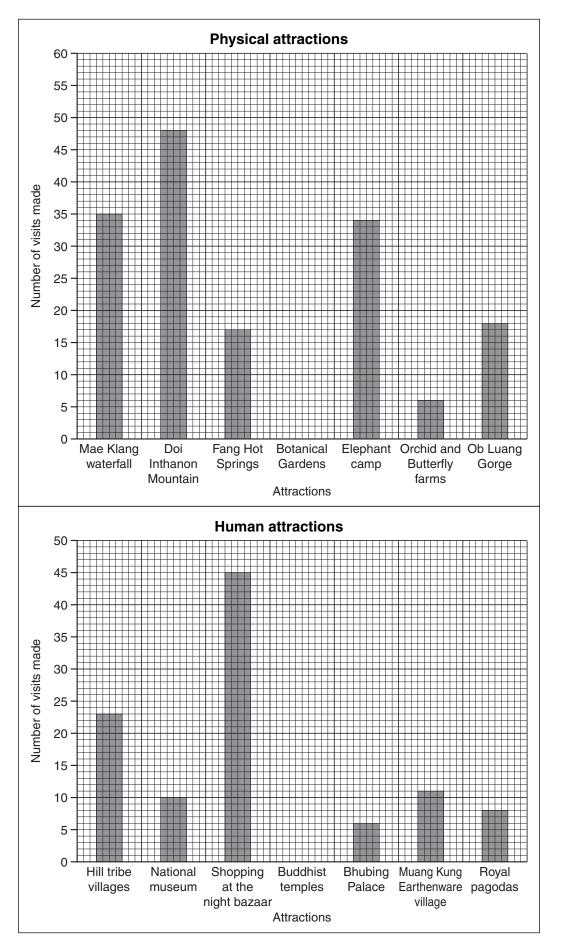

Fig. 15 2217/21/M/J/11

(v) In the space below draw and label a different type of graph that could be used to show the answers from Question 4 (*Overall which attracted you most to Chiang Mai?*) which are also shown in Table 5 (Insert). [3]

For Examiner's Use

| | vi) | The students reached the conclusion that Hypothesis 1: <i>Physical attractions</i> brought more tourists to Chiang Mai than human attractions was false. Do you agree with them? Support your decision with evidence from Table 5 (Insert). | For Examiner's Use |
|-----|------|--|--------------------------|
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | [4] | |
| . , | | students used a different questionnaire to investigate the impact of tourism on ole who lived in Chiang Mai. The questionnaire is shown in Fig. 16 (Insert). The students used a systematic sampling technique to obtain answers to their questionnaire. Suggest how they might have done this. | |
| | | | |
| | | [1] | |
| (| (ii) | Do you think that it was a good idea to ask people for their first and second choices? Explain your decision. | |
| (| (ii) | Do you think that it was a good idea to ask people for their first and second choices? | |
| (| (ii) | Do you think that it was a good idea to ask people for their first and second choices? | |
| | (ii) | Do you think that it was a good idea to ask people for their first and second choices? | |

(c) The answers to Question 2 (What do you think are the main positive impacts of tourism in Chiang Mai?) and Question 3 (What do you think are the main negative impacts of tourism in Chiang Mai?) are shown in Table 6 (Insert).

For Examiner's Use

The students devised this simple formula to work out which impacts were most important.

Positive impact: More jobs and income

1st choice $27 \times 2 = 54$

2nd choice $15 \times 1 = 15$

Total score 69

(i) Use this formula to work out the total score for air pollution.

[2]

Negative impact: Air Pollution

1st choice

2nd choice

Total score

Using the results calculated by their formula the students drew the graphs, Figs 17A and 17B, below.

For Examiner's Use

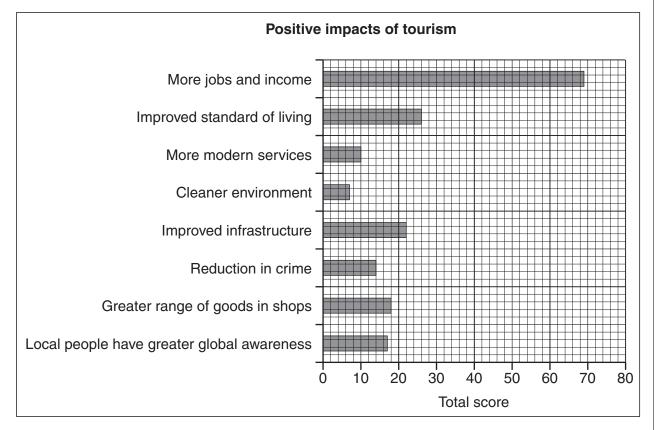

Fig. 17A

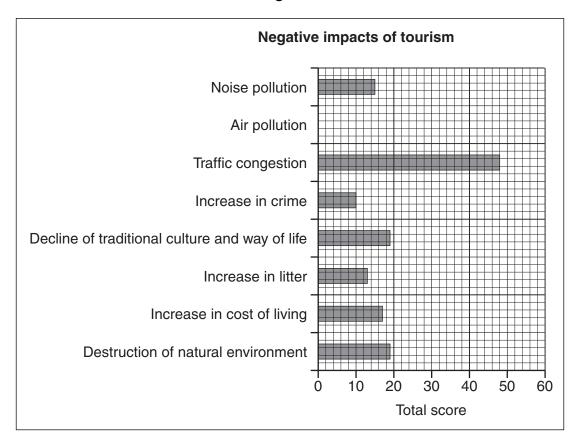

Fig. 17B

(ii) Plot on Fig. 17B the result of your calculation for air pollution in (c)(i).

[1]

| (| (iii) | What conclusion can you make about Hypothesis 2 : Tourism has a positive rather | For |
|-----|-----------|---|-------------------|
| | | than negative impact on people who live in Chiang Mai? Support your decision with | Examiner's Use |
