Paper 2

October/November 2012

1 hour 45 minutes

Candidates answer on the Question Paper.

Additional Materials: Ruler

#### READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer both questions.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [ ] at the end of each question or part question.

|   |      |      |     |
|   | <br> | <br> |     |
|   | <br> | <br> | [6] |

(ii) Another factor which can affect the rate of population growth in a country is the policy of the government.

For Examiner's Use

Look at the information box showing how national population policy changed in Iran between the early and late 1980s.

|  | Population  | policy in Iran  |                |  |
|--|-------------|---|----------------|--|
| Early 1980s Islamic Revolution Ayatollah Khomeini's regime said that it was the duty of all Iranian citizens to have children and expand the population. |             | Late 1980s Regime realised that it had made a mistake. Instead it introduced a policy to reduce population growth * contraception was made more widely available * couples were forced to attend family planning clinics before marriage * child benefits were stopped after three children |                |  |
| Population in 1980   | 40 million  |   |                |  |
| Population estimate made in 1980 for 2005  | 100 million | Actual population in 2005   | 70 million     |  |
| How and why did the early and late 1   |             | policy of the government change i   | n Iran between |  |
|  |             |   |                |  |

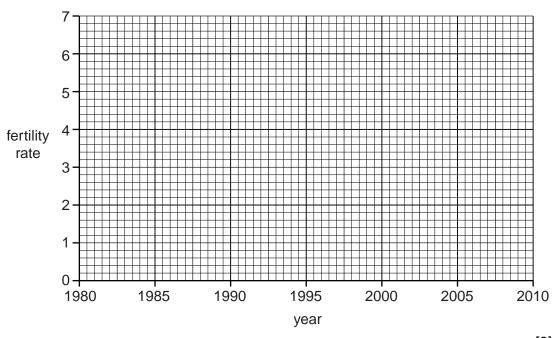

| How and why did the population policy of the government change in Iran between the early and late 1980s?  |
|---|
|   |
|   |
|   |
| [2]   |
| As a result of this change in policy, how big was the decrease in population between the number estimated in 1980 for 2005 and the actual population in 2005? |
| [1]   |

(iv) Look at the data for fertility rates (average number of children per woman over her lifetime) in Iran between 1980 and 2010.

For Examiner's Use

| year           | 1980 | 1985 | 1990 | 1995 | 2000 | 2005 | 2010 |
|----------------|------|------|------|------|------|------|------|
| fertility rate | 6.5  | 6.6  | 5.6  | 4.3  | 2.5  | 2.1  | 2.1  |

Draw a line graph to show the change in fertility rates in Iran from 1980 to 2010.

| 2 | (a) | Look at the chart. It shows percentages of people without access to clean (safe) water |
|---|-----|--|
|   |     | in five regions of the developing world for 1975 and 2005.                             |

| For        |
|------------|
| Examiner's |
| Use        |

- (i) From the chart, name the world region in which:
  - 1. over 80 per cent of the people were without access to clean water in 1975;
  - 2. the greatest percentage of people were without access to clean water in 2005;
  - 3. there was the largest percentage increase of people with access to clean water between 1975 and 2005.

[3]

- (ii) Using the chart, state how the Middle East is different from the other four regions.
- (iii) Suggest reasons why rates of improvement in access to clean water between 1975 and 2005 varied so greatly between developing world regions.

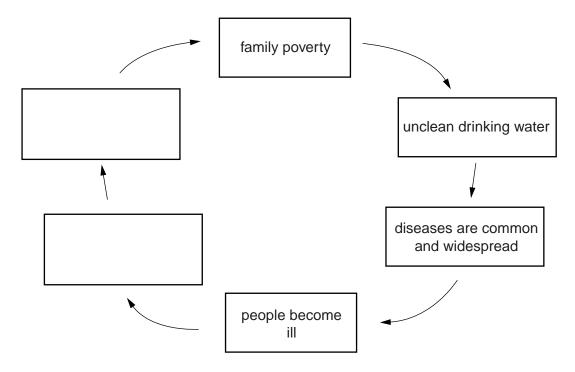

(b) People without access to clean water are the ones most at risk from water-related

|       |                          |                                     |                  |                      |                      |

(iv) Many other people feel ill and weak for long periods of the year. This contributes to the family poverty cycle.

For Examiner's Use

Complete the poverty cycle by filling in the two remaining boxes with suitable labels.

(c) (i) Some people struggle to find enough water, and the water that they find is rarely clean.

Read this report from Practical Action, a NGO (non-governmental organisation) working in developing countries.

For years, the people of Turkana in northern Kenya have suffered persistent periods of drought. In great heat, the women have to walk up to 10 km to dried-up river beds to find water for their families. The women are in danger of being attacked along the way. When they reach the river beds, they dig 'scoop holes' with their bare hands, uncovering small amounts of dirty, polluted water. They have no choice but to drink it.

Explain why the people of Turkana suffer from problems of both water shortage and water quality.

For Examiner's Use

| (ii)  | One of the main reasons for building the dam was to supply Delhi with clean drinking water.   | For<br>Examiner's<br>Use |
|-------|---|--------------------------|
|       | Delhi is the capital city with a population of 16 million people.   |                          |
|       | Approximately how far is Delhi from the dam?  |                          |
|       | [1]   |                          |
| (iii) | After the construction of the dam, the town of Tehri and many villages were flooded. More than 100 farming villages still remain in the area around the Tehri Dam. People living in these villages have found that the construction of the dam has interfered with the natural springs, their main source of water supply for living and farming. |                          |
|       | 'For the first time ever, we are now short of water. We cannot get water from the reservoir itself because its high sides are made of loose gravel and are too steep.'  |                          |
|       | 'Please give us time. In the due course of time, we will be able to help the villagers. We are already sending a daily water tanker.'  Local state official   |                          |
|       | 'What choice have we but to migrate to Delhi?'  |                          |
|       | 'These villagers must look at the bigger picture. The government must think of the national need.  India needs to develop into a big power.'  Indian government official in Delhi   |                          |
|       | Explain what the comments show about the economic and social disadvantages for local people of building large dams.   |                          |
|       |   |                          |
|       |   |                          |
|       |   |                          |
|       |   |                          |
|       | [3]   |                          |

For Examiner's Use

| (iv) | Why are the views of local people usually ignored when large dams are being planned?   |
|------|--|
|      |  |
|      |  |
|      |  |
|      | [2]  |
| (v)  | Is the migration of people to Delhi a good way of dealing with the water problems of villages around the Tehri Dam? Explain your view on this.   |
|      |  |
|      |  |
|      |  |
|      | [2]  |
| (vi) | Between Tehri and Kanpur two large canals take river water from the Ganges for farm use. Kanpur is an industrial city with a population of over 3 million people. It is best known for tanning leather. Its 400 leather tanneries release 30 million litres of waste water back into the Ganges every year. This water is contaminated with chromium and chemical waste. |
|      | Building the Tehri dam has made environmental pollution worse in the River Ganges at and below Kanpur. Suggest reasons for this.   |
|      |  |
|      |  |
|      |  |
|      |  |
|      | [3]  |
|      | [Total: 40]  |
