

UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS General Certificate of Education Ordinary Level

| CANDIDATE NAME | | | | | |
|-------------------|--|--|---------------------|--|--|
| CENTRE NUMBER | | | CANDIDATE NUMBER | | |

BIOLOGY 5090/21

Paper 2 Theory

October/November 2012

1 hour 45 minutes

Candidates answer on the Question Paper.

No Additional Materials are required.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a pencil for any diagrams, graphs or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Section A

Answer all questions.

Write your answers in the spaces provided on the Question Paper.

Section B

Answer all questions.

Write your answers in the spaces provided on the Question Paper.

Section C

Answer either question 8 or question 9.

Write your answers in the spaces provided on the Question Paper.

You are advised to spend no longer than one hour on Section A.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

| For Exam | iner's Use |
|-----------|------------|
| Section A | |
| Section B | |
| Section C | |
| Total | |

This document consists of 13 printed pages and 3 blank pages.

Section A

For Examiner's Use

Answer all the questions in this section.

Write your answers in the spaces provided.

1 The urinary systems of a dog and of a human being are similar in structure and function. Fig. 1.1 shows the urinary system of a dog.

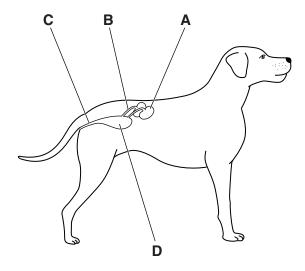

Fig. 1.1

| (a) (i) | Name the parts A, B and C in Fig. 1.1. | |
|---------|--|-----|
| | A | |
| | В | |
| | C | [3] |
| (ii) | State the function of D . | |
| | | [1] |

(b) Fig. 1.2 shows the relationship between an alveolus and a blood capillary in the lung of a mammal. The arrows show the path taken by oxygen from inhaled air entering the blood during gas exchange.

For Examiner's Use

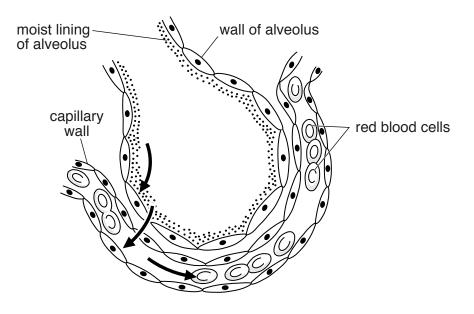

Fig. 1.2

| | (i) | Draw two arrows on Fig. 1.2 to show the path taken by most carbon dioxide leaving the blood. |
|-----|-------|--|
| | | |
| | | [2] |
| | (ii) | Explain why this movement of carbon dioxide is considered to be part of excretion. |
| | | |
| | | |
| | | [3] |
| (c) | carr | mones are also substances that need to be excreted from the body after they have ied out their functions. lain how this is done. |
| | ••••• | |
| | | |
| | | [2] |
| | | [Total: 11] |

2 (a) The graphs in Fig. 2.1 show the effect of changing pH on the rate of reactions controlled by two different enzymes found in the alimentary canal of a mammal.

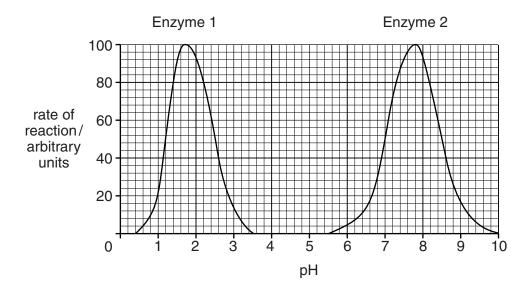

Fig. 2.1

| | (1) | Explain what is meant by the term ph. |
|-----|-------------|--|
| | | [2] |
| | (ii) | Using the information in Fig. 2.1, state the rate of reactions controlled by Enzyme 2 at pH 7. |
| | | [1] |
| | (iii) | Suggest in which part of the alimentary canal Enzyme 1 is likely be active. |
| | | [1] |
| | | Give reasons for your suggestion. |
| | | |
| | | [2] |
| (b) | mol Give | ymes in the alimentary canal are involved in reactions that break down large ecules into small molecules, for example, starch into maltose. e an example in another, named part of the body, where small molecules are built up larger ones. |
| | nam | ned part of the body |
| | sma | ıll molecules |
| | larg | er molecules |
| | | [3] |

[Total: 9]

3 Atmospheric air contains oxygen and carbon dioxide.

For Examiner's Use

[2]

[Total: 10]

(a) Complete table 3.1 to show the percentage of oxygen and carbon dioxide in inhaled and exhaled air.

Table 3.1

| anc. | % gas in air | | | | |
|----------------|--------------|-------------|--|--|--|
| gas | inhaled air | exhaled air | | | |
| oxygen | | | | | |
| carbon dioxide | | | | | |

| (b) | (i) | Explain how oxygen is used by a muscle cell. |
|-----|-------|---|
| | | |
| | | |
| | (ii) | Explain what happens in a muscle cell when oxygen is in short supply. |
| | | [2] |
| (c) | Sug | igh altitudes, oxygen is less available than it is at low altitudes. gest modifications of the circulatory and respiratory systems that might help people live for many years at high altitude. |
| | | |
| | | |
| | ••••• | |
| | | |
| | | [3] |
| | | [3] |

| | | | 6 |
|---|-----|------|---|
| 4 | (a) | Cor | mplete the equation to summarise the process of photosynthesis. |
| | | | |
| | | | + + + |
| | | | |
| | | | [2] |
| | | | oung, green, leafy stem was placed in a clear glass beaker of water in bright light. 4.1 shows the stem 12 hours later. |
| | | | bubbles formed on stem |
| | (b) | (i) | Suggest two places where the bubbles could have come from. |
| | | | 1 |
| | | | 2[2] |
| | | (ii) | Tests proved that the bubbles contained oxygen. Explain how they appeared on the side of this green stem. |
| | | | |
| | | | |
| | | | |
| | | | |

For Examiner's Use

| For Examiner's Use | Explain the benefits to other organisms of having submerged water plants in a pond ecosystem. | (c) |
|--------------------------|---|-----|
| | | |
| | | |
| | | |
| | | |
| | [3] | |
| | [Tatal: 40] | |

Fig. 5.1 shows a palisade cell from the leaf of a flowering plant. 5

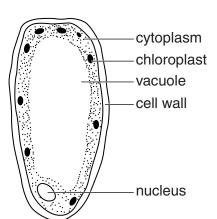

Fig. 5.1

(a) State three ways in which this cell differs from a fungal hypha.

| palisade cell | fungal hypha |
|---------------|--------------|
| 1 | |
| | |
| 2 | |
| | |
| 3 | |
| | |

Fig. 5.2 shows the apparatus used to produce 5 dm³ of red wine from grape juice.

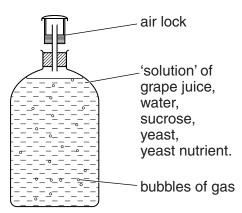

Fig. 5.2

(b) State an equation for the chemical process by which the alcohol is produced.

For Examiner's Use

[3]

[Total: 10]

| | | Table 5.1 | | | |
|---|----------------------------|--|-------------------------------|---------------|--|
| | concentration of alcohol/% | concentration of sugar/grams per dm ³ | number of bubbles per hour | time /days | |
| _ | 0.0 | 200 | 60 | 1 | |
| | 0.0 | 150 | 40 | 2 | |
| | 0.0 | 100 | 20 | 3 7 | |
| | 0.5 | 50 | 2 | | |
| | 2.0 | 30 | 1 | 10 | |
| | | to be produced only after | | | |

Section B

For Examiner's Use

Answer all the questions in this section.

Write your answers in the spaces provided.

| 6 | | r sharp, hollow mouthparts for sucking up their nutrition from the plant. |
|---|-----|--|
| | (a) | Explain why phloem is more suitable for this purpose than any other plant tissue. |
| | | |
| | | |
| | | [3] |
| | (b) | Suggest and explain the effect on the plant shoot of a large number of aphids feeding at the same time over a period of several weeks. |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | [7] |

[Total: 10]

| (a) | Explain the differences between <i>mitosis</i> and <i>meiosis</i> . Your explanation should include references to where the processes occur and why they occur. | For Examiner's Use |
|-----|---|--------------------------|
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | [5] | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | [5] | |

Section C

For Examiner's Use

Answer either question 8 or question 9.

Write your answers in the spaces provided.

8

| (a) | Explain what is meant by double circulation. |
|-----|--|
| | |
| | |
| | |
| | [3] |
| (b) | Describe the composition and the importance of plasma in the circulatory system. |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | [7] |
| | [Total: 10] |

| 9 | (a) | Describe fertilisation in each of the following. | | |
|---|-----|--|---|--|
| | | (i) | a human | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | /::\ | a flavoring plant | |
| | | (11) | a flowering plant | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | [7] | |
| | (b) | Expl | ain the disadvantages of self-fertilisation to a flowering plant. | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | [3] | |
| | | | [Total: 10] | |
