

UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS General Certificate of Education Ordinary Level

| CANDIDATE NAME | | | |
|-------------------|-----------------------------|---------------------|----------------|
| CENTRE NUMBER | | CANDIDATE NUMBER | |
| COMBINED SO | CIENCE | | 5129/02 |
| Paper 2 | | October/N | November 2009 |
| | | 2 ho | urs 15 minutes |
| Candidates ans | swer on the Question Paper. | | |
| No Additional N | Materials are required. | | |

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer **all** questions.

A copy of the Periodic Table is printed on page 20.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

| For Examiner's Use | |

1 Fuel (gasoline) is mixed with air and burned in the engine of a car. The waste gases are passed out of the exhaust of the car. This is shown in Fig. 1.1.

For Examiner's Use

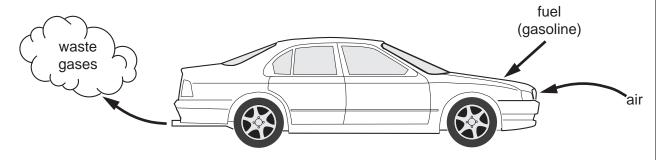

Fig. 1.1

| (a) | Gas | oline is a mixture of hydrocarbons, mainly alkanes, obtained from petroleum. | |
|-----|-------|--|-----------|
| | Ехр | lain the meaning of the term hydrocarbon. | |
| | | | |
| | | [2 | 2] |
| (b) | Nan | ne the gas in the air used when the fuel is burned. | |
| | | [[*] | 1] |
| (c) | (i) | Name the gases produced by the complete combustion of the fuel used in the car. | is |
| | | and[2 | <u>?]</u> |
| | (ii) | Name a gas that is produced during the incomplete combustion of this fuel. | |
| | | [| 1] |
| | (iii) | State one other pollutant in the waste gases. | |
| | | Γ | 11 |

2 (a) Complete the word equation for photosynthesis.

| water | _ | \rightarrow | alucasa . | _ | [2] |
|-------|---|---------------|-----------|---|---------|
| water | | _ | glucose | т | 141 |

For Examiner's Use

(b) An experiment is carried out to investigate the effect of changing light intensity on the rate of photosynthesis. The apparatus is shown in Fig. 2.1.

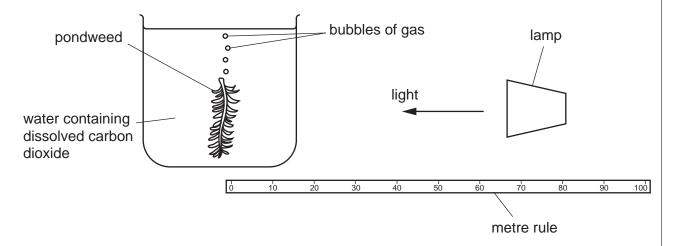

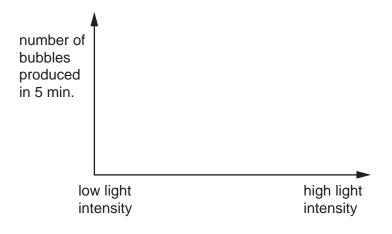

Fig. 2.1

The light intensity at the plant is changed by changing the distance between the lamp and the plant. The rate of photosynthesis is measured by counting the number of bubbles produced by the pondweed in five minutes.

(i) Suggest **one** condition that should be kept constant in this experiment.

.....[1]

(ii) On the axes below, sketch a curve to show the results expected from this experiment.

[2]

(c) Explain why animals depend on photosynthesis.

A car maintains a constant speed of 30 m/s for 20 s.

During the next 20 s, the car accelerates at a constant rate, reaching a speed of 50 m/s.

For Examiner's Use

[2]

(a) (i) On Fig. 3.1, plot a speed-time graph for the car.

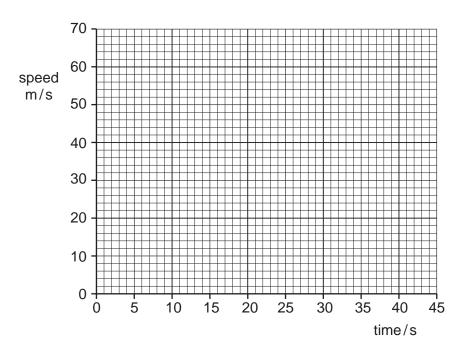

Fig. 3.1

| (ii) | Although the car has a constant speed for 20 s, its velocity may not be constant. |
|------|---|
| | Explain the difference between velocity and speed. |
| | |
| | [2] |

(b) A second car has a mass of 1500 kg.

Calculate the acceleration of the car when the accelerating force acting on it is 5 100 N.

acceleration = unit[3]

4 Some properties of five substances are shown in Fig. 4.1.

| For Examiner |
|-----------------|
| Use |
| |
| |
| |

| substance | conducts electricity when solid | conducts electricity when melted | melting point /°C | soluble in water | |
|-------------|---------------------------------------|--|----------------------|-------------------|--|
| Α | yes | yes | 1539 | no | |
| B no | | no | - 75 | yes | |
| С | yes | yes | 98 | reacts with water | |
| D | no | no | 119 | no | |
| E | no | yes | 772 | yes | |

Fig. 4.1

| (a) | Give the letter, A , B , C , D or E , of the substance that is not a solid at room temperature. | | | | |
|-----|---|---|----|--|--|
| | | [| 1] | | |
| (b) | (i) | Give the letter, A, B, C, D or E, of one Group I metal. | | | |
| | | [| 1] | | |
| | (ii) | Give a reason for your choice. | | | |
| | | | | | |
| | | [| 1] | | |
| (c) | Give | e the letter, A, B, C, D or E, of one ionic compound. | | | |
| | Ехр | lain the reasons for your choice. | | | |
| | com | pound | | | |
| | reas | sons | | | |
| | | | | | |
| | | | 31 | | |

For Examiner's Use

| 7 Chlorine, bromine and iodine are elements in Group VII of the Periodic Table. | | | | | |
|---|-----|---|-------------------|--|--|
| | (a) | State the name given to the elements in Group VII. | Examiner's Use | | |
| | | [1] | | | |
| | (b) | Describe the change of state of the Group VII elements as the group is descended from flourine to astatine. | | | |
| | | [1] | | | |
| | (c) | When bromine is added to potassium iodide, a brown solution is produced. | | | |
| | | Name the products of this reaction. | | | |
| | | and[2] | | | |
| | (d) | State why chlorine is used in the purification of water supplies. | | | |
| | | | | | |
| | | [4] | | | |

8 A human heart is shown in Fig. 8.1.

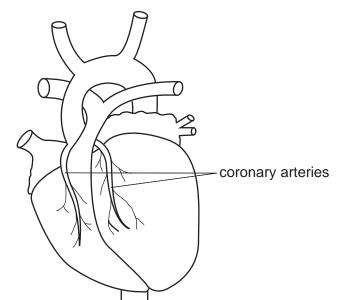

Fig. 8.1

Blood is carried to the heart muscle in the coronary arteries and away from the heart muscle in the coronary veins.

| (a) | State two differences between the blood carried in the coronary arteries and the blood carried in the coronary veins. |
|-----|---|
| | 1 |
| | |
| | 2 |
| | [2] |
| (b) | State two ways in which the structure of the coronary arteries differs from that of the coronary veins. |
| | 1 |
| | |
| | 2 |
| | [2] |
| (c) | A coronary artery may become blocked. This may cause a heart attack. A heart attack is more likely to happen if a person is a smoker. State two other features of a person's lifestyle that may make a heart attack more likely. |
| | 1 |
| | 2[2] |

© UCLES 2009 5129/02/O/N/09

For Examiner's Use **9** A wire is moved downwards between the North and South poles of two magnets, as shown in Fig. 9.1.

For Examiner's Use

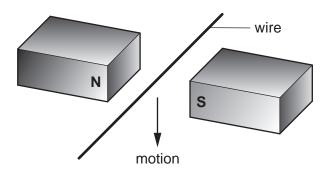

Fig. 9.1

The variation of the induced e.m.f. with time is shown in Fig. 9.2.

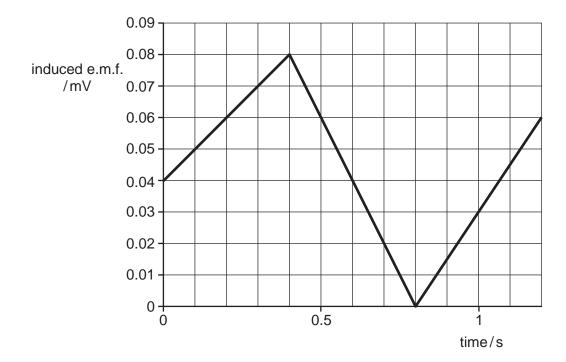

Fig. 9.2

| (a |) Use | Fig. | 9.2 | to | state | at | which | time |
|----|-------|------|-----|----|-------|----|-------|------|
| | | | | | | | | |

(i) the induced e.m.f. is at maximum,s

(ii) the wire is not moving.s

[2]

(b) Name two factors affecting the magnitude of the induced e.m.f.

1.....

10 When potassium manganate(VII) is heated, it decomposes according to the following equation.

$$4 \mathrm{KMnO_4} \, \rightarrow \, 2 \mathrm{K_2O} \, + \, 4 \mathrm{MnO_2} \, + \, 3 \mathrm{O_2}$$

Four students each weigh a test-tube containing some potassium manganate(VII). Each student heats the test-tube, collects the oxygen given off in a gas syringe and then weighs the test-tube again.

The mass and the volume of oxygen given off from each tube are shown in Fig. 10.1.

| mass of oxygen / g | volume of oxygen / cm ³ |
|--------------------|------------------------------------|
| 0.80 | 600 |
| 0.60 | 450 |
| 0.40 | 300 |
| 0.20 | 150 |

Fig. 10.1

(a) On Fig. 10.2, plot a graph of these results.

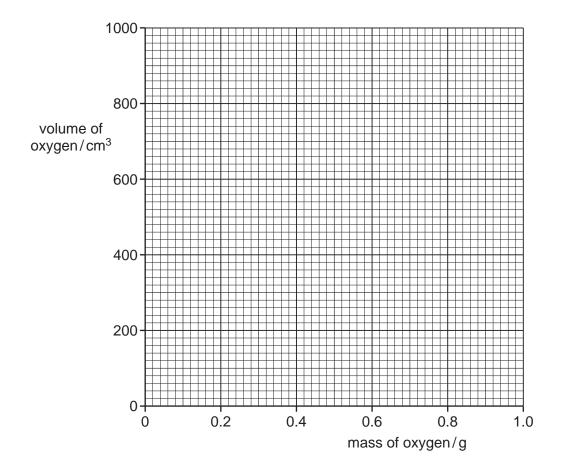

Fig. 10.2

[3]

For Examiner's Use

| | (b) | (i) | Use the graph to find the volume of 1.0 g of oxygen[1] |
|----|--------|--------|---|
| | | (ii) | The relative molecular mass, M_r , of oxygen is 32. Using your answer to (b)(i) , calculate the volume of 32 g of oxygen. |
| | | | Osing your answer to (b)(i), calculate the volume of 52g of oxygen. |
| | | | |
| | | | |
| | | | volume of oxygen = cm ³ [1] |
| | (c) | Sta | te a test to show that the gas given off is oxygen. |
| | | test | |
| | | res | ult[2] |
| | | | |
| 11 | (a) | Use | e the words from the following list to complete the sentences below. |
| | | | alvaali aarban diavida abaat |
| | | | alveoli carbon dioxide chest |
| | | | diffusion osmosis oxygen |
| | The | e wor | |
| | | | diffusion osmosis oxygen |
| | In 1 | the I | diffusion osmosis oxygen ds may be used once, more than once, or not at all. |
| | In 1 | the I | diffusion osmosis oxygen ds may be used once, more than once, or not at all. ungs, |
| | In t | the l | diffusion osmosis oxygen ds may be used once, more than once, or not at all. ungs, |
| | In the | the li | diffusion osmosis oxygen ds may be used once, more than once, or not at all. ungs, |
| | In the | the In | diffusion osmosis oxygen ds may be used once, more than once, or not at all. ungs, |
| | In the | the In | diffusion osmosis oxygen ds may be used once, more than once, or not at all. ungs, |

| 12 | The | following questions are about the transfer of thermal energy. | For |
|----|-----|---|-------------------|
| | (a) | The handle of a saucepan must not get hot. | Examiner's Use |
| | | Name a suitable material for the handle. | |
| | | [1] | |
| | (b) | Explain fully how thermal energy from a radiator travels round a room by convection. | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | [3] | |
| | (c) | Infra-red radiation is incident on two similar objects. The temperature of both rises. One is painted black and the other is white. | |
| | | State why the temperature of the black object rises more quickly. | |
| | | [1] | |

13 A student wants to find which coloured dyes have been mixed together to make dye X. She separates a sample of dye X and samples of coloured dyes using paper chromatography.

For Examiner's Use

Her results are shown in Fig. 13.1.

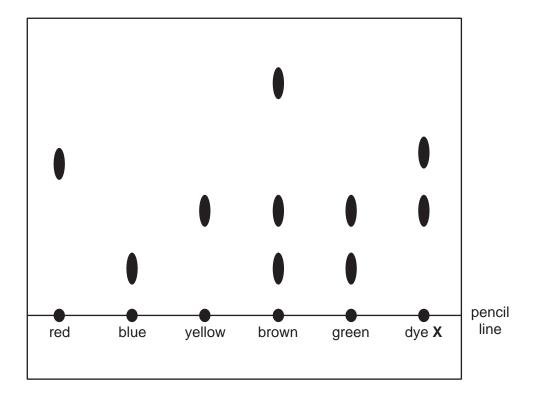

Fig. 13.1

| (a) | Explain why the line is drawn in pencil and not in ink. |
|-----|---|
| | [1] |
| (b) | Which colours are present in dye X? |
| | [2] |
| (c) | Which coloured dye contains a substance not present in any of the other coloured dyes? |
| | [1] |

For

Examiner's Use

[3]

To investigate the action of amylase, four test-tubes are set up as shown in Fig. 14.1. Each test-tube contains starch solution and amylase. В C Α D starch solution starch solution starch solution starch solution amylase amylase amylase amylase 100°C 100°C 35°C 35°C pH 1 pH 1 pH 7 pH 7 Fig. 14.1 (a) At one-minute intervals, a sample from each tube is tested for sugar. State and explain in which tube you would expect sugar to be produced most quickly.[2] (b) For this reaction, name (i) the enzyme, (ii) the substrate, (iii) the product.

15 Parallel rays of light are incident on a thin convex lens as shown in Fig. 15.1.

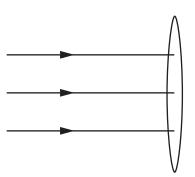

Fig. 15.1

- (a) Complete Fig. 15.1 to show what happens to the rays after they pass through the lens. [2]
- **(b)** A ray of light is incident on a glass block as shown in Fig. 15.2.

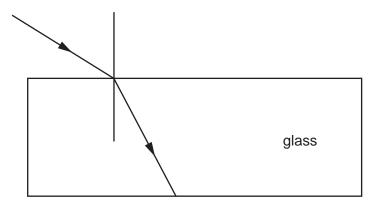

Fig. 15.2

- (i) On Fig. 15.2, mark the angle of incidence with the letter *i* and the angle of refraction with the letter *r*. [2]
- (ii) The angle of incidence *i* and the angle of refraction *r* are related by the equation

$$\frac{\sin i}{\sin r} = n.$$

State the name given to the constant n.

.....[1]

(c) Visible light and infra-red light are both components of the electromagnetic spectrum.

Name **two** other components of the electromagnetic spectrum.

...... and[2]

For Examiner's Use

16 (a) Use the words from the following list to complete the sentences below.

Each word may be used once, more than once, or not at all. electrons element ions gained lost isotopes neutrons protons The nuclei of atoms are made up of and and When atoms form positive ions, are are Atoms of the same but with different numbers of neutrons are called In a neutral atom, there are the same number of and [4] **(b)** An atom of radon is represented by ${}^{222}_{86}$ Rn. Calculate the number of neutrons in this atom of radon. number of neutrons =[1]

17 The female reproductive system is shown in Fig. 17.1.

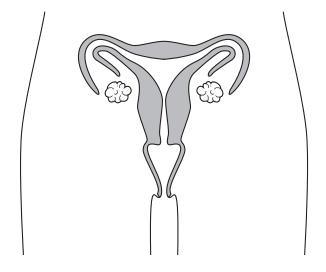

Fig. 17.1

| (a) | On | Fig. 17.1, mark the cervix with the letter X . | [1] |
|-----|-------|---|---------|
| (b) | In w | which part of the reproductive system does each of these processes occur? | |
| | (i) | ovulation | |
| | (ii) | fertilisation | |
| | | | |
| | (iii) | implantation | |
| | | | [3] |
| (c) | Exp | lain what is meant by fertilisation. | |
| | | | |
| | | | |
| | | | [1] |

18 A metre rule rests on a table. A book is placed on one end of the metre rule and a student pushes down on the other end, as shown in Fig. 18.1

For Examiner's Use

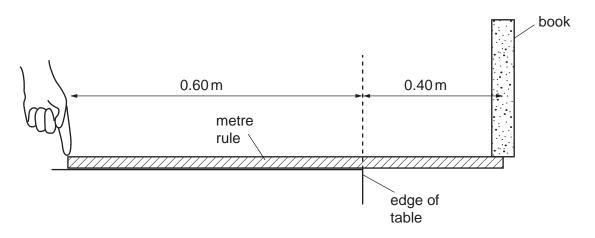

Fig. 18.1

The weight of the metre rule can be ignored.

- (a) On Fig. 18.1, draw an arrow to show the direction of the gravitational force acting on the book.
- (b) The book weighs 6.0 N.

Calculate the moment of the weight of the book about the edge of the table.

| moment = unit unit | | [2] | l |
|--------------------|--|-----|---|
|--------------------|--|-----|---|

(c) The boy just manages to stop the metre rule tipping clockwise.

Calculate the minimum force with which the student pushes on the metre rule.

force = N [2]
