Paper 4

February/March 2018
1 hour 30 minutes

Candidates answer on the Question Paper.

No Additional Materials are required.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use an HB pencil for any diagrams or graphs.

Do not use staples, paper clips, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer all questions.

Electronic calculators may be used.

You may lose marks if you do not show your working or if you do not use appropriate units.

Study the appropriate source materials before you start to write your answers.

Credit will be given for appropriate selection and use of data in your answers and for relevant interpretation of these data. Suggestions for data sources are given in some questions.

You may use the source data to draw diagrams and graphs or to do calculations to illustrate your answers.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

map of the world

map of Kazakhstan

Area of Kazakhstan: 2.72 million km²

Population: 18 million

Children per woman: 2.31

Life expectancy: 70.6 years

Currency: Tenge (335 KZT = 1 USD)

Languages: Kazakh, Russian

Climate: cold temperate interior, very cold winters and very warm summers, desert and semi-desert

Terrain: large area of flat grassland (steppe) in the north and west, mountains in the east, deserts in the south

Main exports: aluminium, copper, crude oil, iron, uranium

Kazakhstan is dependent on the export of crude oil and related products. It is the world's leading producer of uranium. The country has a high adult literacy rate. Although the wealth of the country is increasing, the health of the population remains low and only one quarter of the population is employed.

(a) Calculate the number of people in employment in Kazakhstan.

1

		million [1]							
(b) The government of Kazak	hstan is committed to sustaina	ble development.							
One definition of sustaina	ble development is:								
•	Development that meets the needs of the present generation without harming the ability of future generations to meet their own needs.								
Employment and access	Employment and access to clean water are examples of these needs.								
Complete the table with to	Complete the table with two other human needs.								
	human need								
	employment								
	clean water								

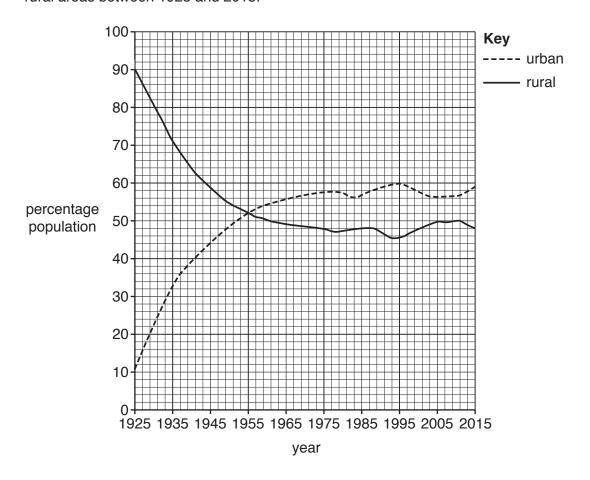

[2]

(c) The map shows the population per \mbox{km}^2 in Kazakhstan.

Caspian Sea	Astana Almaty Aral Sea	Key major road capital city major city international boundary population per km² less than 2.0 2.1–5.0 5.1–10.0 10.1–20.0 more than 20.0	
(i)	Use the map to describe the pattern of population	on per km ² in Kazakhstan.	
		_	2]
(ii)	The south of Kazakhstan is a desert but contain Suggest two reasons for this. 1		
	2		

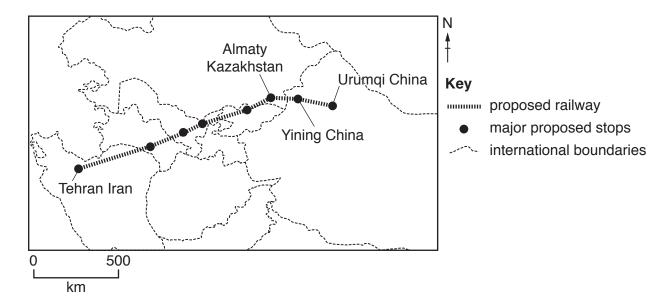

[2]

(d) The graph shows the percentage of the population in Kazakhstan who lived in urban and rural areas between 1925 and 2015.

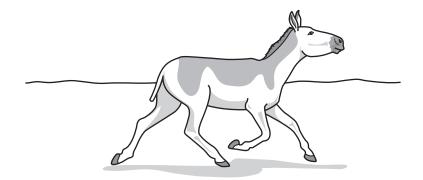

between 1925 and 2015	 the internal migr	ation of people in	Nazakiisiai
			[3]

(e) The map shows a proposed high-speed railway. The railway would link China to western Asia, through Kazakhstan.

(i)	Suggest why the governments of Kazakhstan and China want to build the proposed high-speed railway link.
	[2

(ii) This proposed high-speed railway link will pass through the Kazakhstan steppe, where the threatened Wild Ass, or Kulan, live.

	Explain how the Kazakhstan government could protect the Wild Ass.
	[2]
(iii)	Wild Ass is on the International Union for Conservation of Nature (IUCN) Red List of threatened species.
	Suggest how being on the IUCN Red List could benefit the population of Wild Ass.
	[2]
(iv)	Apart from threatening the Wild Ass, suggest one other reason why this proposed high-speed railway link might not be built.
	[1]

(f) In 1997, the capital city of Kazakhstan was changed from Almaty in the southeast of the country to Astana in the north, an underdeveloped part of the country.

A student wants to carry out a survey to find out people's views about the change of capital city and record their answers using a questionnaire. The student proposed three plans.

plan A

Visit one street in the north of Almaty and ask 20 people their views about the change of the capital city.

plan B

Visit one street in the north, south, east and west of Astana and ask 20 people in each street their views about the change.

plan C

Visit one street in the north, south, east and west of Astana and of Almaty and ask 20 people in each street their views about the change.

(i)	Explain why plan A will give the least valid results.	
		[2
(ii)	Give two reasons why plan C is better than plans A and B.	
	1	
	2	
		[2

- (iii) The student wanted to use a questionnaire to find out:
 - if people thought the change of the capital city was a good idea
 - how people have benefited or been disadvantaged by the change of the capital city.

Here is part of the questionnaire:

1.	Which age	e group are y	you in?				
	20 – 29	30 – 39	40 – 49	50 – 59	60 – 69	70 and over	
2.	What is yo	our sex?					
	male	female					
3.							
4.							
5.							
		e questionna about the ch			re suitable	questions the s	student co
D	escribe hov	w the studen	t could have	e selected th	e people fo	r the questionn	aire.
•							

(g) One of the reasons for changing the capital city was that Almaty is located in an earthquake

	zon	е.
	(i)	The government was concerned about having a capital city in an earthquake zone.
		Describe economic reasons why the government was concerned.
		[4
((ii)	Suggest why some people chose to stay in Almaty despite the threat of earthquakes.
		[4

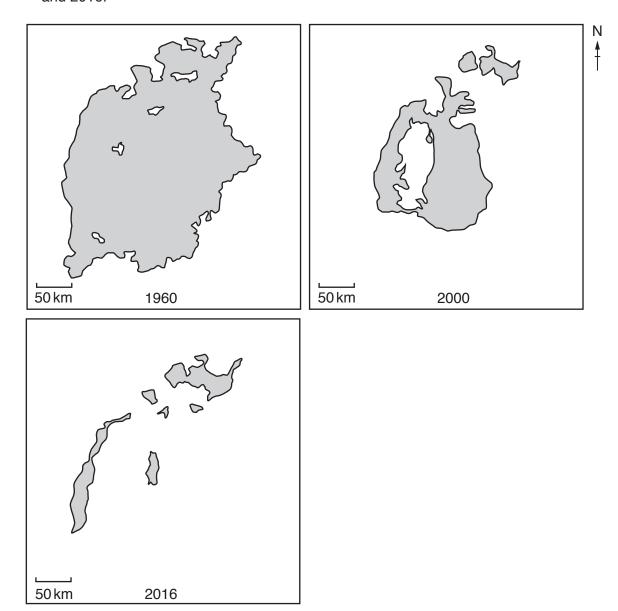

(h)	Between 1949 and 1989 the Soviet Union conducted more than 400 nuclear tests in the northeast of Kazakhstan. After the tests ended, large amounts of radioactive material were left on the abandoned area.
	Suggest why people in the northeast of Kazakhstan are still concerned about this area.
	[0]

BLANK PAGE

2 (a) The Aral Sea is in the southwest of Kazakhstan on the border with Uzbekistan.

In the 1960s, the two rivers that flowed into the Aral Sea were diverted to irrigate the desert region surrounding the sea. This diversion led to less water reaching the sea, water levels in the sea decreased and the concentration of salt in the water (salinity level) increased. The surrounding land became contaminated with toxic levels of salt. These changes have been described as an environmental disaster.

The diagrams show the changes to the surface area of water in the Aral Sea between 1960 and 2016.

			15				
(i)	Use the different 1960		timate the per	centage decre	ease in surfac	e area of the Aral So	эа
	Circle the I	oest estimate.					
		10%	25%	75%	90%		[1]
(ii)	Suggest th	e impacts on	the Aral Sea e	cosystem as	a result of dec	reasing water levels	-
							[3]
56	ettlements (sh	arity towns).					
Sı	uggest three	problems face	ed by people li	ving in informa	al settlements		
1							

(c) Some of the fishermen from the Aral Sea region became sugar beet farmers.

Sugar beet is a commercial crop grown in Kazakhstan.

Sugar beet will only produce a good crop when grown in soil with a pH between 6.5 and 8.0.

A student wanted to find out which field had the best soil pH for growing sugar beet.

The student recorded the yield of sugar beet from four different fields in a notebook.

	Ì
field 1 had thirty five tonnes per hectare	
thírd field = 28.5	
number 4 had 40.7 tonnes per hectare	
21.2 in field 2	

(i) Present the student's data in a suitable table.

(ii)	Suggest which field had the best pH for growing sugar beet. Give a reason for answer.	our/
	field number	
	reason	
		 [1]
(iii)	Suggest what the student should have measured as well as yield in each field.	
		[1]

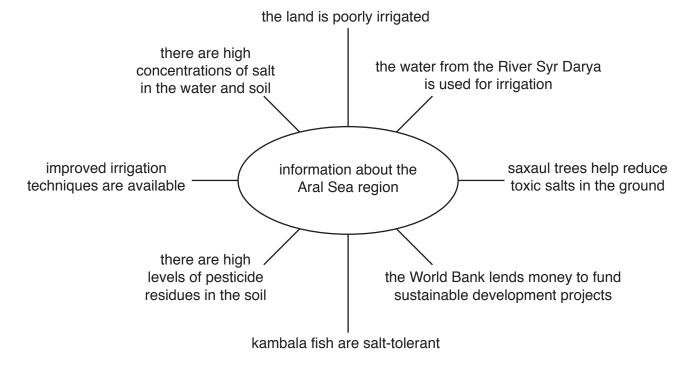

[2]

(iv)	Give two reasons why the student cannot be sure that the results show a link betw soil pH value and sugar beet yield.								oetweer	า
